CONSPIRACY THEORY (DAVISSON-J., 2016)

DF \$60

47", Tet, 9", Dor, M, Frag, UFO

Hybridizer's description: One of my best landscape plants to date....it's a huge plant for the back or center of your bed or for a massive display all by itself....this one gets BIG. Vibrant 9" yellow crispate blooms open wide on monster scapes that are 47" tall with wide spaced 6 way branching, 30 buds, that easily hold 3 or 4 blooms open at once without crowding. Instant rebloom scapes have 4 way branching and bloom an additional 20 blooms. This is a blooming machine that starts midseason and goes very late. Vigorous plants increase fast with gorgeous dormant foliage. Pollen fertile. I have not been able to set a pod but customers in a cooler climate have been successful. From Seedling 2819 (AL'S PEACH TOWER X LIGHTHOUSE NORTH) x BANANA SMOOTHIE.

LOUD GIRLS (DAVISSON-J., 2008)

DF \$30

32", Tet, 9.50", SEv, M, UFO

LOUD GIRLS (Davisson Fall 08) is an "improved WEBSTER'S PINK WONDER" having the same vigorous plant habit, but a much improved flower. Huge 9 1/2 "hot" rose-pink blooms have a lighter rose pink Munson type watermark and a fine white edge. Sepals quill and petals spatulate and crispate so LOUD GIRLS was registered as an unusual form. 32" scapes have 3 way branching and carry 17 buds. Unlike WEBSTER'S PINK WONDER which is pod infertile, LOUD GIRLS is easily fertile both ways. Blooms midseason and is a semi-evergreen. Tetraploid. Carries its beautiful, clear color and size and shape to its progeny. Limited.

MARVELOUS MERRY GREY (DAVISSON-J., 2020)

DF \$50

36", Tet, 8", SEv, ML

MARVELOUS MERRY GREY (Davisson-J 20) is a cheerful 8" clear, light gray with a huge yellow watermark that shines in the mid to late season. Scapes are 36" with wonderful 5-way branching and a bud count averaging 25. Excellent at clump strength, when I have recorded even better branching and bud counts. It is also fragrant with faultless foliage and hardy semi-evergreen plant habit. MERRY GREY is a tetraploid from a cross of PATTY IN PINSTRIPES X CAROLINA COOL DOWN and is fertile both ways.

MISS DEMEANOR (DAVISSON-J., 2011)  
 49", Tet, 8", SEv, M, UFO  
 Hybridizer's description: MISS DEMEANOR is a 9" apricot unusual form with a washed yellow watermark and fine yellow edges. Petals crispate and sepals curl back tightly. I almost composted this one the first year it bloomed because it's a different color similar to MEAN GREEN, but the scape won my heart (see next picture). Scapes are 49" with 5 and 6 way branching, 24 to 30 buds, plus another 9 buds on rebloom scapes. Starts midseason and continues into late season. A semievergreen tet from a cross of ORANGE CLOWN X WHERE EAGLES SOAR. Difficult but not impossible as a pod parent, easy pollen. A garden standout! Limited

MISTER GREEN JEANS (DAVISSON-J., 2013)  
 45", Tet, 9.50", SEv, EM, V Frag, Re, UFO  
 Yellow with a chartreuse throat. Tetraploid. This 9 1/2" yellow crispate unusual form has tall, 45" scapes with the same 5 way "self cleaning" branching as SUNNY INTERVALS where deadheads hang straight down and fall to the ground. The original scapes have 20 buds and the plant is strongly recurrent, showing larger 10" blooms on the immediate rebloom scapes for an additional 11 blooms. Very fragrant! Segments twist and curl with increasing heat and humidity. Inheriting hardy plant habit from both Goldner and Gossard parents, it's a SEV that starts blooming early midseason and continues thru late season. Difficult, but not impossible as a pod parent, easy pollen. SUNNY INTERVALS X WHERE EAGLES SOAR

MISTER MONOPOLY (Davisson 12) is an 8 1/2 to 9" bright orange cascade with a wide yellow throat, lemon edges, and tightly curled petals that are ornately serrated at the tips. Interesting viewed from the backside! Monster scapes are sturdy and tall at 41 to 44 inches, with 6 and 7 way branching, 25 to 34 buds (see scape photo). Strongly recurrent with immediate rebloom for a long, long bloom season starting mid-season. Hardy, dormant plant habit. Difficult but not impossible as a pod parent. Easy pollen. Vigorous plants increase quickly. MEAN GREEN X TALL GIRLS.

Hybridizer's description:

REDNECK REUNION is an 8 1/2" ivory and peach blend, unsophisticated in its triangular tailored form, but an important component in my quest for tall, sturdy, well branched scapes. Taking the best of both parents (AL'S PEACH TOWER X WEBSTER'S PINK WONDER) it has tall, husky 50" scapes with 4 to 5 way branching and 26 to 28 buds and it reblooms. Add dormant plant habit, a nice fragrance, and easy fertility both ways even on hot days and you have the makings of a hybridizer's dream parent. A clarifier that will add height and size. DF \$28

35",Tet,5",SEv

TEPIN (Culver-B, 2016) TET-35"- MLa - 5" A yellow-gold flower with a ruffled bright clear dark red eye and edge above a green throat. 4-way branching; bud count 25. (Flamingo Carousel X Dragon Master). Hybridizer's description: The offspring of two of our hottest coloured introductions this daylily has stood out among its full siblings as something to behold. With its clear bright bold colours along with a great garden performance this plant is yelling to anyone within earshot, look at me, look at me. It is a vigorous grower and bounces back very nicely from dividing. Fertile both ways.

TOWER POWER (DAVISSON-J., 2009) DF \$15  
 42", Tet, 8", SEv, M, Vfrag, Re  
 TOWER POWER is something totally different for hybridizers and gardeners alike. It's a huge 8" showy cream peach, yellow, and pink polychrome open form that is displayed on tall 42" scapes with wide 5 to 6 way branching and 29 buds. Strongly recurrent, it starts blooming early midseason and continues through late season. Exceptional plant habit comes from its pollen parent, AL'S PEACH TOWER, a line bred descendant of TET FRANCIS FAY. The pod parent is Webster's COSMIC RAY. Blooms always open without crowding and are extremely fragrant blooming right under your nose where you can smell them. Exceptional plant habit carries through to seedlings...it can improve the height and branching on round forms or improve the strength of scapes on more spidery forms equally well. The color is a clarifier. Difficult but not impossible as a pod parent; easy as a pollen parent. Semievergreen.

TWO HOOTS AND A HOLLER (DAVISSON-J., 2020)

DF \$60

38",Tet,9.50",SEv,ML

Hybridizer's description: TWO HOOTS AND A HOLLER is a sibling to MACON MONEY showing the diversity in the GIRLS CLUB X ROSES FOR DALLAS cross. TWO HOOTS is a 9 1/2 inch diamond dusted ivory and cream peach blend unusual form (cascade). Scapes are 38" with wide-spaced 4- and 5-way branching and a bud count averaging 26 buds per scape. TWO HOOTS AND A HOLLER begins blooming in the mid-late season and continues for late season bouquets of bloom. It clumps quickly and has been a favorite for displaying blooms for a long period of time. It is both pod and pollen fertile and is a hardy semi-evergreen.
